

UD Restaurant Operations Guide for Managers

Introduction

This document serves as a comprehensive guide for managing daily operations, handling staff, troubleshooting, and maintaining the high standards of service in the restaurant. It provides clear protocols to ensure smooth functioning, covering common issues and best practices for managing the team and the environment.

1. Troubleshooting Procedures

Lighting Issues

- **Problem:** No lights upstairs.
- **Solution:**
- Check if the dimmable switches near the affected area are properly adjusted.
- If the issue persists, go downstairs to the electrical room and inspect the circuit breakers. If any switch has tripped, reset it.
- If lights still don't work, call Aderito to arrange for an electrician.

Water Leakage or Spillage

- **Problem:** Water leaks, especially around the glass washer or under the hand washer upstairs.
- **Solution:**
- Turn off the nearby valve to stop the water flow. You may need a screwdriver to close the valve.
- Once the leak is controlled, arrange for someone to inspect and repair the machine.

Air Conditioning Issues

- **Problem:** AC is not blowing air.
- **Solution:**
- Check the AC settings upstairs near table 19. Ensure that the setup is correct.

- If the settings are fine, go downstairs to electrical board and check the power switch to ensure it hasn't been turned off.
- If power and settings are correct but there's still no air, it may be an element failure. In this case, contact the technician to resolve the issue.

Speaker System

- **Problem:** No sound or malfunctioning speakers.
- **Solution:**
 - Check the speaker control panel in the staff room to ensure the system is powered on.
 - Ensure the microphone and volume is on, cables are properly connected, and volume levels are adequate.
 - If the problem persists, check the audio cables connected to the laptop.

CCTV System

- Note: The front camera is currently malfunctioning, but the rest of the system is operational. Always ensure you are following data protection laws when accessing footage. Contact me if further assistance is required.

Printer Issues

- **Problem:** The printer is not printing or shows an error.
- **Solution:**
 - Verify that the paper roll is properly inserted. If the red light is flashing, it may indicate a paper jam or loading error.
 - Restart the printer if necessary.
 - If tickets aren't printing due to an internet issue, check the Wi-Fi connection. If the issue persists, restart the router downstairs.
 - In emergencies, use mobile data sharing with iPad to continue processing payments.

Toilet Blockages

- **Problem:** Toilets are flooding or not working due to blockages.
- **Solution:**
- The Suniflo system in the customer toilets may become blocked if inappropriate items (e.g., baby wipes) are flushed.
- In case of a blockage and flooding, turn off the water valve and lock the toilet. Post a notice stating it is out of order.
- Contact a technician to resolve the issue, and keep the toilet closed until it is fully operational again.

2. Staff Performance and Behaviour Management

Dealing with Staff Lateness or Policy Violations

- **Action:**
- Have a one-on-one conversation with staff members who are late or violate policies. Ensure they understand the issue and the expectations moving forward.
- Regularly follow up to monitor improvement and ensure they stay on track.

Managing Staff Conflicts

- **Problem:** Disagreements or tension between staff members.
- **Solution:**
- Address conflicts quickly and professionally. Use a balanced approach to mediate, ensuring all parties feel heard.
- In cases of emergency or unexpected absences, contact team members from other branches for assistance. Aderito also available to step in when needed.

3. Health and Safety Protocols

Ensuring Hygiene and Safety Standards

- **Requirements:**
- All staff must have a Level 1 Food Hygiene Certificate and be familiar with the restaurant's hygiene protocols.

- Staff should regularly wash their hands, use clean cloths, wear appropriate protective gear (hairnets, gloves), and ensure cross-contamination does not occur.
- Ensure the kitchen and service areas are clean, clear of obstructions, and free from pests.
- Food safety is paramount—ensure proper food storage and handling practices are followed.

4. Staff Training and Development

Ongoing Training Initiatives

- Goal: Ensure all staff reach their potential through proper training.
- Guidelines:
 - Schedule regular training sessions to reinforce operational procedures, health and safety practices, and customer service excellence.
 - We will provide access to online training materials and offer paid opportunities for specialised courses if needed (e.g., barista training).
 - Provide ongoing feedback to staff, ensuring they remain up to date with changes and continue improving.

5. Sustainability and Waste Management

Minimising Waste

- **Key Practices:**
 - Ensure staff avoid discarding food unnecessarily. For example, sauces or ingredients that are still usable should be repurposed where appropriate.
 - Reduce excessive use of plastics by using eco-friendly takeaway packaging and encouraging mindful resource use.
 - Regularly review inventory management to minimise food waste by avoiding over-preparation.

Recycling and Resource Efficiency

- **Action:** Train staff on proper recycling practices. Ensure that waste is sorted correctly and that efforts are made to conserve energy by turning off equipment when not in use.

6. Operational Procedures

Cash Handling and End-of-Day Closing

- **Procedure:**
- At the end of each shift, cash should be counted and stored securely in the designated area downstairs.
- Regular audits will be conducted to ensure accuracy and address any discrepancies.

Key Management

- **Procedure:**
- Each keyholder must be tracked. You will be given a spare key, and it is essential to know who else has access to the restaurant for security purposes.

Ensuring Food Quality

- **Procedure:**
- If the food being prepared doesn't meet the restaurant's quality standards, ask the kitchen staff to redo it before serving it to customers.

Delivery and Takeaway Orders

- **Procedure:**
- Double-check takeaway orders for accuracy before handing them to customers. Ensure that **drinks** and correct portion sizes are included to prevent errors.

7. Handling Customer Complaints

Dealing with Complaints

- **Action:**
- Always handle customer complaints with professionalism and empathy. Aim to resolve issues in a way that satisfies the customer without compromising the restaurant's standards.
- Provide clear communication and take action to rectify the problem swiftly.

8. Communication and Team Management

Improving Communication Between Upstairs and Downstairs

- **Solution:**
- Establish clear communication channels between the kitchen and the front-of-house staff, especially before large bookings or during peak hours. Ensure both teams stay informed to avoid confusion or delays.

Taking Care of the Team

- **Action:**
- Keep an eye on staff morale and well-being. Small rewards, such as offering a drink during breaks, can go a long way in showing appreciation for their hard work.
- Encourage kitchen staff to stay hydrated, particularly during busy shifts, by providing water when needed.
