

Health & Safety Policy, HACCP, and Fire Risk Assessment

Ugly Dumpling - Markets

Market Locations: [Various locations]

Reviewed Date: 31/08/2025.

Next Review Date: 31/08/2026

Operations Manager: Aderito Barros

Market Supervisor: Saicharan

Part 1 – Statement of Intent

Ugly Dumpling is committed to providing a safe and healthy environment for all our employees, customers, contractors, and visitors at our market stalls. We recognize our legal and moral obligations to ensure the highest standards of health, safety, and food hygiene. Our goal is to prevent accidents, injuries, and work-related ill health, and to maintain a culture of safety that is embedded in all our operations.

We will achieve this by:

- Complying with all relevant UK health and safety legislation, including Health and Safety at Work etc. Act 1974, the Food Safety Act 1990, and all associated regulations.
- Implementing and maintaining a robust food safety management system based on the principles of Hazard Analysis and Critical Control Point (HACCP).
- Conducting regular and thorough risk assessments for all work activities and implementing effective control measures to minimize risks.

- Providing all employees with the necessary information, instruction, training, and supervision to carry out their work safely and competently.
- Ensuring that all work equipment is suitable for its intended use, properly maintained, and regularly inspected.
- Maintaining a safe and healthy workplace, with safe access, and adequate welfare facilities.
- Preventing accidents and cases of work-related ill health by managing health and safety risks in the workplace.
- Actively promoting a positive health and safety culture where all employees are encouraged to participate in and contribute to our safety management system.
- Regularly monitoring our performance and reviewing this policy to ensure it remains effective and relevant to our business needs.

This policy statement is communicated to all employees, are reviewed, and updated at least annually, or more frequently if there are significant changes to our operations or to legislation.

Signed:

Aderito Barros, Ops Manager

Date: 31/08/2025

Part 2 – Responsibilities

Overall Responsible Person

Aderito Barros, Ops Manager, has overall responsibility for health, safety, and food hygiene across all Ugly Dumpling sites, including the market stalls. This includes:

- Ensuring that the company complies with all relevant health and safety legislation.
- Providing adequate resources for the implementation of the health and safety policy.
- Appointing competent person to assist in managing health and safety.
- Ensuring that all employees are aware of their health and safety responsibilities.
- Reviewing the health and safety policy and performance on a regular basis.

Market Supervisor

Saicharan is responsible for the day-to-day management of health and safety at the market stalls. His duties include:

- Implementing the company's health and safety policy at the market stalls.
- Conducting and reviewing risk assessments for the market stalls.
- Ensuring that all employees at the market stalls are professionally trained and supervised.
- Investigating accidents and incidents and taking corrective action.
- Conducting regular health and safety inspections of the market stalls.

Competent Person

Aderito Barros, Ops Manager, is the designated Competent Person for health and safety. He has the necessary skills, knowledge, and experience to provide advice and guidance on health and safety matters.

Fire Wardens

Fire Wardens are appointed for the market stalls and are responsible for:

- Assisting with the implementation of fire safety procedures.
- Carrying out regular fire safety checks.
- Assisting with fire drills and evacuations.
- Ensuring that all fire-fighting equipment is in good working order.

First Aiders

First Aiders are appointed for the market stalls and are responsible for:

- Providing first aid treatment in the event of an accident or injury.
- Maintaining the first aid box and ensuring it is adequately stocked.
- Recording all first aid treatments in the accident book.

Part 3 – Arrangements

Risk Assessments & Safe Systems of Work

Ugly Dumping ensures that suitable and sufficient risk assessments are conducted for all work activities at the market stalls. These assessments will identify the hazards present and evaluate the risks to employees and others. We will then implement effective control measures to eliminate or reduce these risks to an acceptable level. All risk assessments are recorded and reviewed regularly, or more frequently if there are any significant changes.

Safe systems of work are developed for all high-risk activities, including the use of:

- **Gas Cooking Appliances:** Procedures for safe transport, setup, use, and storage of gas cylinders and cooking appliances.
- **Fryers:** Procedures for safe operation, cleaning, and oil changes to prevent burns and fires.
- **Basta Box:** Procedures for the safe operation and temperature monitoring of the Basta box to ensure frozen dumplings are maintained at the correct temperature.
- **Hot Lamps:** Safe handling procedures to prevent burns.
- **Allergens:** Procedures for the safe handling and segregation of allergenic ingredients to prevent cross-contamination.

Training

All employees at the market stalls receive health and safety training appropriate to their roles and responsibilities. This will include:

- **Induction Training:** All new employees receive induction training covering the company's health and safety policy, emergency procedures, and key workplace risks.
- **Food Hygiene Training:** All food handlers are trained to Level 2 in Food Hygiene, with supervisors and managers trained to Level 3.
- **Allergen Training:** All employees involved in food handling and service receive training on allergen awareness and the company's allergen management procedures.
- **Fire Safety Training:** All employees receive training on fire safety, including the use of fire extinguishers and the emergency evacuation procedures. Fire Wardens receive additional training.
- **Gas Safety Training:** All employees who work with gas cooking appliances receive training on their safe use, transport, and storage.
- **Manual Handling Training:** Employees who are required to carry out manual handling tasks receive training on safe lifting techniques.
- **COSHH Training:** Employees who work with hazardous substances receive training on the safe use, storage, and disposal of these substances.
- **Knife Safety Training:** All kitchen staff receive training on the safe use, storage, and cleaning of knives.

Training records are maintained for all employees at the market stalls.

Accident Reporting & RIDDOR

All accidents, incidents, and near misses at the market stalls must be reported to the Market Supervisor immediately. All accidents are recorded in the accident book, and an investigation is carried out to identify the cause and prevent a recurrence.

Serious accidents and incidents are reported to the Health and Safety Executive (HSE) in accordance with the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR). This includes:

- Fatalities
- Specified injuries.
- Injuries that result in an employee being off work for more than seven days
- Occupational diseases
- Dangerous occurrences
- Incidents involving members of the public who are taken to hospital for treatment.

Fire Safety & Emergency Arrangements

Ugly Dumping is committed to ensuring the highest standards of fire safety at the market stalls. We will:

- Carry out a fire risk assessment for the market stalls, with a specific focus on the use of gas cooking appliances and review it regularly.
- Provide and maintain appropriate fire-fighting equipment, including fire extinguishers (wet chemical, CO2) and fire blankets.
- Develop and implement an emergency evacuation plan for the market stalls.
- Carry out regular fire drills and record the results.
- Appoint and train Fire Wardens for the market stalls.

Slips, Trips & Falls

We take all reasonable steps to prevent slips, trips, and falls at the market stalls. This will include:

- Maintaining good housekeeping standards and keeping floors and walkways clear of obstructions.
- Cleaning up spills immediately and using warning signs.
- Ensuring that floors are in good condition and are not slippery.
- Providing adequate lighting.

Manual Handling

We take all reasonable steps to reduce the risk of injury from manual handling activities at the market stalls. This will include:

- Avoiding manual handling where possible.
- Assessing the risks of all manual handling tasks that cannot be avoided.
- Providing mechanical aids where appropriate.
- Providing training on safe lifting techniques.

Work Equipment (PUWER)

All work equipment at the market stalls is suitable for its intended use and are maintained in a safe condition. We ensure that:

- All equipment is regularly inspected and maintained.
- All employees are trained in the safe use of the equipment they are required to use.
- All dangerous parts of machinery are guarded.
- All equipment is fitted with appropriate controls, clearly marked controls.

Electricity & Gas Safety

All electrical and gas installations and equipment at the market stalls are installed, maintained, and inspected by competent persons. We ensure that:

- All portable electrical appliances are regularly tested (PAT testing).
- All gas appliances and cylinders are inspected regularly and are used in accordance with the manufacturer's instructions.
- All employees are trained to use electrical and gas equipment safely.

COSHH (Control of Substances Hazardous to Health)

We use various cleaning chemicals and substances at market operations. A COSHH assessment has been carried out for all hazardous substances, and the following control measures are in place:

COSHH Risk Assessment Summary

Substance	Hazard Classification	Risk Rating	Exposure Route	Control Measures	PPE Required
Degreaser	Irritant, Flammable	Medium	Skin contact, Inhalation, Eye contact	Use in well-ventilated area, Avoid skin contact, Store away from heat sources	Gloves, Eye protection, Apron
Floor Cleaning Solution	Irritant	Low-Medium	Skin contact, Eye contact	Dilute correctly, Avoid prolonged skin contact, Use non-slip footwear	Gloves, non-slip footwear
Bleach (Sodium)	Corrosive, Oxidizing	High	Skin/Eye contact,	Never mix with other chemicals, Use	Gloves, Eye protection, Apron, Face

Hypochlorite)			Inhalation	in ventilated area, Store securely away from acids	mask if splashing risk
Rinse Agent	Irritant	Low	Skin/Eye contact	Use correct dilution, Avoid eye contact, Store properly	Gloves when handling concentrate
Soap/Hand Soap	Mild Irritant	Very Low	Skin contact	Use as directed, Avoid prolonged contact with broken skin	None required for normal use
Dishwasher Cleaner	Corrosive, Irritant	Medium-High	Skin/Eye contact, Inhalation	Use correct dosage, avoid skin contact, Ensure proper ventilation	Gloves, Eye protection
Descaler	Corrosive	High	Skin/Eye contact, Inhalation	Never mix with bleach or other chemicals, Use in ventilated area, Store securely	Gloves, Eye protection, Apron
Oven Cleaner	Corrosive, Irritant	Medium-High	Skin/Eye contact, Inhalation	Use in well-ventilated area, allow surfaces to cool, Store securely	Gloves, Eye protection, Apron
Sanitizing Solution	Irritant	Low-Medium	Skin/Eye contact	Use correct dilution ratios, Store away from food, Rotate stock	Gloves when handling concentrate
Glass Cleaner	Irritant	Low	Eye contact, Inhalation	Use in ventilated area, Avoid eye contact, Store upright	Eye protection if splashing risk

Control Measures for Market Operations:

- All hazardous substances are stored in secure, lockable containers during transport and operation.
- Safety Data Sheets (SDS) are available for all chemicals and are accessible to all staff.
- All staff are trained in the safe use of cleaning chemicals.
- Appropriate PPE is provided and must be worn when handling hazardous substances.
- Chemicals are never mixed unless specifically instructed by the manufacturer.
- **Special attention to bleach:** Never mix bleach with descaler, acids, or ammonia-based products.
- All containers are properly labelled and dated.
- Dilution charts are available at each market location.
- First aid procedures for chemical exposure are clearly displayed and portable first aid kits include eye wash.
- Spill procedures are in place and staff are trained in emergency response.
- Regular inventory checks ensure chemicals are within expiry dates.
- Adequate ventilation is ensured at all market locations.
- Chemicals are stored away from food preparation areas and gas cylinders.

Food Safety Management (HACCP/SFBB)

We implement and maintain a food safety management system based on the principles of HACCP (Hazard Analysis and Critical Control Point) or SFBB (Safer Food, Better Business) at the market stalls. This will include:

- Identifying all food safety hazards.
- Identifying the critical control points (CCPs).
- Establishing critical limits for each CCP.
- Monitoring the CCPs and taking corrective action if necessary.
- Keeping records to demonstrate that the system is working effectively.

Allergen Management

We are committed to protecting our customers with food allergies and intolerances at the market stalls. We will:

- Provide clear and accurate information about the 14 major allergens in our dishes.
- Train all our staff on allergen awareness and our allergen management procedures.
- Take all reasonable steps to prevent cross-contamination of allergens in our kitchens.
- Ensure that our allergen information is kept up to date.

Pest Control

We take all reasonable steps to prevent pest infestations at the market stalls. We will:

- Maintain high standards of cleanliness and hygiene.
- Store all food in sealed containers.
- Dispose of all waste correctly.

Waste & Oil

All waste at the market stalls is stored in suitable containers and disposed of in accordance with the market's regulations. We ensure that:

- All waste is stored in a way that does not attract pests.
- All waste is disposed of regularly.
- All waste oil is collected by a licensed waste carrier.

Personal Hygiene & Staff Fitness to Work

All employees at the market stalls are required to maintain a high standard of personal hygiene. This includes:

- Washing hands regularly, especially after using the toilet, handling raw food, and cleaning.
- Wearing clean protective clothing.
- Reporting any illness or infection to the Market Supervisor before starting work.

Lone Working & Security

We take all reasonable steps to ensure the safety of employees who work alone at the market stalls. This will include:

- Assessing the risks of lone working.
- Providing lone workers with appropriate training and supervision.
- Ensuring that there are adequate communication systems in place.

Monitoring, Audits, Review

We monitor our health and safety performance at the market stalls to ensure that our policies and procedures are effective. This will include:

- Regular inspections of the workplace.
- Audits of our health and safety management system.
- Reviewing our health and safety policy and procedures on a regular basis.

Part 4 – HACCP Manual (Appendix)

Introduction & Scope

This HACCP (Hazard Analysis and Critical Control Point) manual forms a key part of Ugly Dumpling's commitment to food safety at our market stalls. It is designed to identify, evaluate, and control food safety hazards throughout our entire process, from delivery of raw materials to the service of finished dishes to our customers. This system is based on the seven principles of HACCP and is designed to comply with UK and EU food safety regulations.

The scope of this HACCP plan covers all food handling and preparation activities at our market stalls. This includes:

- **Delivery:** Receiving and checking all food deliveries.
- **Storage:** Storing all food items at the correct temperatures and in the correct conditions, including the use of the Basta box for frozen dumplings.
- **Preparation:** Preparing all food items, including washing, chopping, and mixing.
- **Cooking:** Cooking all food items to the correct temperatures using gas cooking appliances.
- **Hot Holding:** Holding hot food at the correct temperatures before service.
- **Service:** Serving food to customers in a safe and hygienic manner.

Hazard Analysis & Critical Control Points (CCPs)

The following table outlines the hazard analysis and critical control points for our key processes at the market stalls:

Process Step	Hazards	Control Measures	Critical Control Point (CCP)?	Monitoring	Corrective Action
Delivery	Microbiological contamination (e.g., bacteria, viruses), Chemical contamination (e.g., cleaning chemicals), Physical contamination	Check delivery vehicle condition, check packaging for damage, check use-by dates, check temperatures of	Yes	Check and record temperatures of all chilled/frozen deliveries	Reject deliveries that do not meet temperature requirements, are damaged, or are past their use-by date

	(e.g., pests, foreign objects)	chilled/frozen foods			
Storage (Basta Box)	Microbiological growth due to incorrect temperature	Store frozen dumplings in the box at -18°C or below	Yes	Monitor and record Basta box temperatures every 2 hours	Adjust Basta box temperature, discard any food that has been stored at the wrong temperature for too long
Preparation	Cross-contamination from raw to cooked foods, Microbiological contamination from staff, Allergen cross-contamination	Use separate chopping boards and utensils for raw and cooked foods, Wash hands regularly, Follow allergen management procedures	No	Supervise staff, regular training	Retrain staff, discard contaminated food
Cooking (Gas)	Survival of microbiological hazards due to undercooking, Fire/explosion from gas leak	Cook food to a core temperature of 75°C or above, Follow gas safety procedures	Yes	Check and record core temperatures of cooked foods with a calibrated probe thermometer, Check gas connections for leaks	Continue cooking until the correct temperature is reached, turn off gas supply and ventilate the area if a leak is detected
Hot Holding	Microbiological growth in hot food	Keep hot food above 63°C	Yes	Check and record temperatures of hot-held food every 2 hours	Reheat food to 75°C or discard if it has been below 63°C for more than

					2 hours
Service	Contamination of food by staff or customers	Train staff in hygienic food handling, Protect food from contamination by customers	No	Supervise staff	Retrain staff

High-Risk Processes

We have identified the following as high-risk processes at the market stalls that require specific control measures:

- **Gas Cooking Appliances:** The use of gas cooking appliances presents a risk of fire and explosion. All staff must be trained in their safe use, transport, and storage. Gas cylinders must be stored upright in a well-ventilated area, away from sources of ignition.
- **Hot Oil Fryer:** The hot oil fryer presents a risk of burns and fire. All staff must be trained in its safe operation, including procedures for filtering and changing the oil. A suitable fire extinguisher (wet chemical) is located near the fryer.
- **Basta Box:** The Basta box is critical for maintaining the safety of our frozen dumplings. The temperature of the Basta box must be monitored regularly to ensure it remains at -18°C or below.

Allergen Protocol

Ugly Dumpling is committed to providing a safe dining experience for customers with food allergies at our market stalls. We have a strict allergen management protocol in place:

- **FOH (Front of House) Order Taking:** When a customer informs us of an allergy, the server will record the allergy on the order and communicate it clearly to the kitchen.
- **BOH (Back of House) Segregation:** The kitchen takes all reasonable steps to prevent cross-contamination. This includes using separate chopping boards, utensils, and cooking equipment for allergen-free meals. We will also ensure that allergenic ingredients are stored separately.
- **Allergen Information:** We maintain an up-to-date allergen matrix for all our dishes, which are available to customers on request.

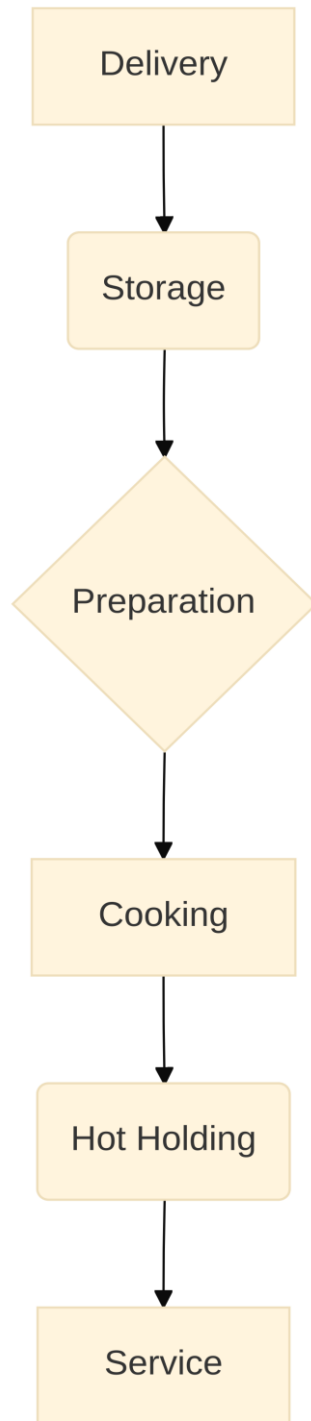

Monitoring Templates

The following templates are used to monitor our HACCP system at the market stalls:

- **Basta Box Log:** To record the temperatures of the Basta box every 2 hours.

- **Cooking & Hot Holding Temps:** To record the core temperatures of cooked foods and the temperatures of hot-held foods.
- **Cleaning Schedule:** To ensure that all areas and equipment are cleaned and disinfected on a regular basis.
- **Allergen Order Log:** To record all orders from customers with allergies.
- **Pest Log:** To record all pest sightings and the actions taken.
- **Training Matrix:** To record all food safety training completed by staff.
- **Induction Checklist:** To ensure that all new employees receive the necessary food safety training.

Process Flow Diagram

Part 5 – Fire Risk Assessment (Appendix)

Markets Fire Risk Assessment

Location: Various Market Stalls

Assessor: Aderito Barros

Date of Assessment: 31/08/2025

1. Fire Hazards

- **Sources of Ignition:** Naked flames (gas cooking appliances), electrical equipment (Basta box, lighting), faulty wiring.
- **Sources of Fuel:** Gas cylinders (LPG), cooking oil, packaging materials (cardboard, paper), waste materials.
- **Sources of Oxygen:** Natural ventilation.

2. People at Risk

- **Employees:** All staff working at the market stall.
- **Customers:** All customers visiting the market stall.
- **Other Market Traders and Visitors:** People in the vicinity of the stall.

3. Fire Safety Measures

- **Fire Detection and Warning System:** Staff are trained to be vigilant for signs of fire and to raise the alarm verbally.
- **Fire Fighting Equipment:** Fire extinguishers (wet chemical, CO2) and fire blankets are provided and regularly serviced.
- **Gas Safety:** Gas cylinders are stored and used in accordance with the manufacturer's instructions. They are kept in a well-ventilated area, away from sources of ignition. All connections are checked for leaks before use.
- **Escape Routes:** Escape routes are kept clear at all times.
- **Fire Safety Training:** All staff are trained in fire safety procedures, including the use of fire extinguishers and the evacuation plan.
- **Maintenance:** All electrical and gas equipment is regularly inspected and maintained by competent persons.

4. Emergency Plan

- **On discovering a fire:** Raise the alarm immediately by shouting "Fire!".
- **Tackle the fire (if safe to do so):** Use the appropriate fire extinguisher to tackle the fire, but only if it is safe to do so. Do not take any risks.
- **Evacuate:** Evacuate the area immediately. Go to the designated assembly point for the market.

- **Call the fire brigade:** Dial 999 and ask for the fire service. Give the location of the market stall.
- **Assembly Point:** [Designated Assembly Point for the Market]

5. Findings, Actions, and Review

- **Findings:** [List any findings from the fire risk assessment]
- **Actions:** [List any actions required to address the findings]
- **Review:** This fire risk assessment is reviewed annually, or more frequently if there are any significant changes to the equipment or work activities.

Final Sign-Off

This Health & Safety Policy, HACCP, and Fire Risk Assessment has been reviewed and approved by:

Operations Manager:

Aderito Barros

Date: 31/08/2025
